

Annual General Meeting 2021

Repost on the Station Garden

We are delighted to announce that we have now taken responsibility for creating a new Hadley Wood Station Garden adjacent to Platform 4. Together with our Station Manager (Yande) and GTR we will be working in partnership to create a lovely space for flowers and shrubs. We are grateful to both GTR and Network Rail who joined us a few weeks ago to clear all the beds and make them ready for our volunteer gardeners. We are also extremely grateful to our local residents who have already offered to help with the gardening as, without them, this project would not have got off the ground.

Andreas Ekkeshis, a long-time resident of Hadley Wood, and his friends have kindly taken the lead on this and if any other residents would like to join them, they would be most welcome. Come springtime, we look forward to celebrating our garden coming into flower with a proper event where Network Rail and GTR can join us to see the fruits of our gardeners' labour over the forthcoming months.

The station garden is one of the mitigations offered by Network Rail as a result of our successful 'Treegate Campaign' (together with the Hadley Wood Rail User Group), along with the Hedge Planting Trial beside the cycle path, a variety of new trackside trees and leaving us with all the beautiful older trees above the tunnels.

We are always open to suggestions for planting – and donations – and any additional help will be gratefully received.
